

Vaccine Availability

Steps to follow to have a clean setup and smooth working of this:

1. Open the code shared on Github.
2. Add details where required correctly and do not forget to remove <> sign as well. Put details under "" only.
3. Create an email id as a dummy email to send mails to your's email.
4. Do not forget to enable the lowsecureapps access from below mentioned address:

<https://www.google.com/settings/security/lesssecureapps>

5. Do not forget to run certificates from below:

 IDLE	Today at 4:05 PM	188 KB	Application
 Install Certificates.command	03-May-2021 at 10:49 PM	1 KB	Termin...ll script

6. Also, do not forget to allow import to requests to Python IDE like PyCharm.

HOPE EVERYONE GETS VACCINATED SOON
TOGETHER WE FIGHT COVID-19
